

Plan ahead with Fabric Data integration features are being delivered in Fabric first. Explore what's available and plan your migration to Fabric. [Start exploring](#)

The screenshot displays the Microsoft Fabric Data Factory interface. On the left, a navigation pane includes 'Home', 'Author' (selected), 'Monitor', 'Manage', and 'Learning Center'. The 'Factory Resources' section on the left lists 'Pipelines' (1), 'Datasets' (3: cleaned_sales, DelimitedText1, DelimitedText2), 'Data flows' (1: CleanSalesFlow), and 'Power Query' (0). The main workspace shows the 'SalesPipeline' with a search bar containing 'd'. The 'Activities' list includes 'Move and transform' (Copy data, Data flow), 'Synapse' (Spark job definition), 'Azure Data Explorer' (Azure Data Explorer C...), 'Databricks' (Notebook, Jar, Python, Job), and 'Data Lake Analytics' (LI-SOI). The 'Data flow' activity is selected, and its configuration pane is open. The configuration pane has tabs for 'General', 'Settings', 'Parameters', and 'User properties'. The 'Settings' tab is active, showing 'Run on (Azure IR)' set to 'AutoResolveIntegrationRuntime' and 'Compute size' set to 'Small'. The 'Advanced' section is expanded, showing 'Logging level' set to 'Verbose' and 'Sink properties' and 'Staging' sections.
